

# A “do it yourselfer’s dream” The *Woody* log building kit

## What's included in the log kit?

Fully illustrated installation instructions and an installation video  
Full construction blue prints suitable for the building permit application  
Alignment track and hardware for simple accurate job start  
Code compliant solid 8” thick pine tongue and groove seasoned wall logs  
Structural 8”x10” vertical support logs that “tie in” the horizontal wall logs and roof  
Code compliant “R” values and uplift bolts to secure the building to the foundation  
Pre-drilled electrical base outlet openings every 56” ready to install wiring  
Massive 3”x12” solid timber rafters pre-cut that lock into the top wall plate  
Decorate structural wall shear and ridge plates for each rafter allowing for “free span”  
Pre-built gable end rough framing with matching eve rafters  
Guaranteed to fit log parts. The *Woody* is like assembling Lego's Money back guarantee if not satisfied!  
**A complete material list of items needed from the local lumber yard not included in the kit.**

Interior walls can be placed anywhere in the cabin as they are not required for load bearing

## How do I get a cost and order my *WOODY* ?

1. Select one of our standard designs or “napkin sketch” your own *Woody* log cabin that suits your dreams
2. Contact the factory direct at **1-800-564-1677** or e mail: info @ cabintek.com and we will direct you to the *Woody* dealer in your area. If there is not a dealer close by you will have a personal factory liaison to answer any question you may have as well as guide you thorough the process. We understand that you will have many questions and we are eager to help you with your *Woody* project.
3. You and your dealer or your factory liaison will work with our in house designer to determine the final *Woody* design and cost. There may be a small deposit required for the final plans that can be used as a credit to the final *Woody* purchase. (ask for details) Your building plans will be available to you **before delivery** so that you can get any final building permit approvals as required. Hurry the design and building permit process can take up to 6 weeks. Once finalized we can generally ship within days. You will received a complete list of all items included in your purchase as well as a detailed agreement document that covers everything that is included and what is not included but needed to finish the *Woody*.
4. You will schedule a delivery date once you are comfortable that all designs, agreements and building permits are in order.

## What if I am not a “do it yourselfer”?

*Cabintek Log Homes* the parent company of the *Woody* cabin kits can help you arrange for a local contractor or we can arrange to have one of our factory trained installers give you a day or two of on site help or complete the entire installation. We can supply windows, doors, cabinets or whatever you decide to have us supply. You have great flexibility. The *Woody* is designed for easy assembly needing just basic tools and knowhow. You can save a bundle by doing it your self with a crew of friends and neighbors

## How do I see an installed *Woody*?

If we have not delivered a *Woody* near you, our factory is located in central Wisconsin near Wausau. (Central Wisconsin Airport) We can arrange accommodations and a factory tour including a tour of finished *Woody*'s in our area. We will reimburse your travel expenses up to \$1,000 should you decide to move forward with your *Woody* cabin project. The \$1,000 will be a credit to your purchase. (some restrictions apply)

**We encourage a visit as seeing is believing, I know your will be impressed !**
